- ▶ Nurturing Resilience and Adaptability
- ▶ Inspiring Collaborative Spirit
- ▶ Building Confidence to Lead
- ▶ Mentorship for Leadership Excellence
- ▶ Encouraging Social Responsibility
- ▶ Leading by Example
- ▶ From Potential to Impact

PREFACE

Dear Friends,

In the current global village, where communication, innovation and technology such as AI dominate and even bypass humanity, moulding students and bringing them up to meet the challenges of the world has become a herculean task. It is rightly said, 'children are not things to be moulded, but people to be unfolded' Yes, the effective way to strengthen our students with global competencies is to unfold the hidden potentials in them. Our students are highly potential, skilled and industrious as most of them are from families of industrious and courageous farmers and labourers.

From 2022 onwards, we have been conducting the 'Beautiful Minds' programme for students in IX and X standards with a view to exploring their potentials. Almost 750 students are attending the programme.

'Blooming Minds' is an output of a year-long research about our school education system and expectations of its stakeholders including employers in India and abroad. The aim is to inculcate an urge in students to learn topics realizing their application in life. By adding fun to learning, 'Blooming Minds' creates the best educational experience possible. It is an online programme consisting of 100+ classes; 75 sessions on subjects and 30 sessions of Personality Development and Global Competency Building; which will be made available to students during Monday, Wednesday and Saturday at 7.30 pm from 01 May, 2024 onwards. Every class will be of 20 minutes duration only, and grasping is made easy with the help of visuals. The vision is to bring the potentials of technology and expertise within the reach of an average household in Kerala and to make their wards confident and globally competent. We strongly believe that our specially trained teachers will open a new spectrum of learning for our students and the dream of 'Blooming Minds' realized.

Thanks & Regards,

Msgr. Sebastian Vethanath
